DOE/EIA-0218(85/30) Distribution Category UC-98

Weekly Coal Production

Energy Information Administration Washington, D C

Highlights

U.S. coal production in the week ended July 27, 1985, as estimated by the Energy Information Administration, totaled 18.02 million tons (bituminous coal and lignite, 17.95 million tons; Pennsylvania anthracite .07 million tons). This was 11.5 percent higher than in the previous week, and 5.8 percent lower than in the corresponding week of 1984.

Cumulative U.S. coal production from January 1 through July 27, 1985 was estimated at 498.07 million tons, 4.0 percent below the 518.94 million tons produced in the comparable period in 1984.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DDE/EIA-0218(84/40)).
